Junior Mechanical Engineer / Draftsperson
Small firm in New York City, near Penn Station

Responsibilities will include 3D modeling in Solidworks, detailing, preparation of BOMs, and assisting with the drafting of descriptive product documentation.

The candidate will be working in a small but dynamic design team, under the supervision of current engineering staff, and must be ready to work under pressure in a tight time schedule.
This is a great opportunity for new graduates who are adept at drafting and CAD and want to pick up practical machinery design knowledge and experience.
  - Good working knowledge of standard drafting practices
  - Proficiency with Solidworks is definite asset
  - Excellent written communication skills in English
  - Practical knowledge of manufacturing processes is very useful

Apply, as usual, on http://www.njit.edu/cds
