CO: NAME:  P & R Fasteners  CMM Programmer / Quality Technician

Custom component parts supplier is actively searching for a Quality Control Technician for their Central, NJ operation.

Responsibilities:

Perform incoming dimensional and visual inspection of specialty component parts for original-equipment-manufacturers (OEM) in the automotive, power tools and consumer products industries
* Handle necessary quality control (QC) paperwork for the company
* Always striving for ways to improve product quality

Requirements:

* Previous quality control experience that involved dimensional and visual inspection of component parts
* Skilled in the use of inspection equipment such as: Coordinate Measuring Machines - CMM, vernier calipers, thread plug and ring gages, optical comparators, Rockwell hardness testers, and surface testers
* PC-DMIS experience preferred, Sheffield Micro-Hite DCC experience a plus
* Proven experience and ability to compile Production Part Approval Process - PPAP, First Piece Inspection - FPI's and other QC paperwork
* Mechanically inclined

Candidates must be willing to submit to a drug screen and background check
This position includes a competitive compensation and comprehensive benefit package. If interested, please respond by submitting a resume, cover letter and salary history/requirements.
