Jeffrey Beck ’86
Outstanding Alumnus

Jeffrey Beck is the president of the home robots division of iRobot Corp., the world’s leading provider of robots used in military, industrial and home applications.

He joined iRobot, based in Bedford, Mass., in 2009 as president and general manager of its home robots division. He’s responsible for the division’s global strategy, product development and operations.

Beck is an executive, who over the course of his career, has succeeded in connecting technologies and the right market opportunities, and delivering long-term profitable growth.

His business success has spanned across many different industries, ranging from robotics to energy to automation to aerospace. He is also recognized as a strong leader who creates an upbeat environment of success and purpose while attracting high performing managers and engineers to his teams. He’s an engineer who is also an excellent communicator, one who can explain his purpose with clarity and vision. In every company he’s worked for, he’s been promoted to higher positions.

Prior to joining iRobot, Beck served as senior vice president and general manager of the aerospace and defense division of AMETEK, Inc. He previously held senior management positions at Danaher Corporation and Emerson Electric Corporation.

He graduated from NCE in 1986 with a bachelor’s degree in mechanical engineering. He lives in Windham, New Hampshire, and is a member of the NCE Advisory Board.
