Professor Sanchoy Das
NCE Excellence in Teaching Award

Department of Mechanical and Industrial Engineering

Professor Sanchoy Das is immensely popular with students, who respect him for his intellect and consistently rate him as an excellent teacher.

He has taught a number of undergraduate courses in the department and developed three new graduate courses. He's also developed classes for the new master's-degree programs in Health Care Systems and Pharmaceutical Systems. These new degree programs are already successful. In 1990, when NJIT started its Manufacturing Engineering (ME) program, Sanchoy offered a sequence of graduate courses that are now constitutive the core courses for the master's degree in ME. These courses continue to be popular, with graduate students in Manufacturing Engineering as well as with students with other majors.

In addition, Sanchoy Das is active in research in the area of Supply Chain Management and Manufacturing Systems, and is known for calling upon his industrial experiences to inform his classes and benefit his students. In the last three years, he has advised and graduated five doctoral students. He also serves as adviser to graduate students in various graduate programs. All students, both undergraduate and graduate, value his teaching and advising. That is why he receives the NCE Excellence in Teaching Award.
