Tai serves our University community in many ways and areas. In the past he has worked on campus in the resident halls and he currently works in the NJIT Center for Academic & Professional Enrichment (CAPE) where they applaud his dedication, creativity and insights. He is outstanding as a math tutor for every level and an expert with MATLAB. However, Tai has always found time to volunteer his services. He has been a counselor for the NJIT Freshman Honors Retreat, worked with Habitat for Humanity, the New Jersey Beach Sweep in Ocean County, helped with the NCE career days and with our department for the weekend open houses. He co-organized a career workshop with Career Development Services (CDS) and Pi Tau Sigma in his capacity as President. He also serves as Vice President of Tau Beta Pi.

Tai is currently taking a graduate course and plans to continue his education in graduate school.

An outstanding asset of NJIT is our student diversity and this quality greatly adds to the education of our students outside of the classroom and to the enrichment of campus life. Tai forms a part of that rich mosaic being from Vietnam where he works over the summer.

Congratulations to Tai Anh Duong, this year's recipient of the Outstanding Senior Award.
